Rapid II

- Improved thread tear-off
- Increased repeatability precision
- For very fast intermitting
- Easy maintenance
- Smallest dimensions
- With integrated filter
- Compatible to Robatech®, ITW® or other systems

Rapid II - the fastest highspeed application gun

UES rapid application guns represent highest speed and precision in application. The optimised AOAC (opened and closed by air) application mini-guns open up a new dimension for speed and accuracy in repeat operations and thus extend the range of applications.

- Single module mini application gun for highest speed
- For very fast intermitting dot/bead applications at 3 ms
- Improved thread tear-off and increased repeatability precision
- Smallest dimensions for use in areas with little space
- Incl. module H3000S air/air of the newest generation
- Optional with needle seat module H3000NA and integr. nozzle, orifice 0,20 mm
- Incl. 132576 5/2-ways solenoid valve, fast switching (incl. 5 m cable) and integrated filter 130353 (100 mesh)
- Connections compatible with systems from Robatech®, ITW® and many more

The nonstick coating and the precise manufacturing of our products are a main feature of UES quality standards.
